

Category	Why it fits HyperNova's SC²Nano™ emulsified, non-detect THC broad-spectrum CBD	Where to find more targets
Pet product brands (direct)	Primary target — buys finished oil/ingredient to formulate their own tinctures/treats; core pitch is no THC + nano-emulsified + fast onset	State pet-food licensing rolls (PA Dept of Ag, MD State Chemist's Office registrant list), Thomasnet (19 PA / 18 NJ / 3 MD listed suppliers), regional directories
Pet supplement contract/co-manufacturers	Force multiplier — each one formulates for many brands, so one relationship opens several downstream customers at once; several are already NASC Preferred Suppliers	NASC Preferred Supplier directory (nasc.cc), Thomasnet 'pet supplements' category
Human OTC nutraceutical/supplement contract manufacturers	Fastest-growing adjacent market; ~47 states allow THC-free broad-spectrum CBD for human OTC sale per your prior research; NJ/PA has a dense cluster of these plants	Thomasnet 'Nutritional Supplement & Vitamin Contract Manufacturing', NJMEP manufacturer directory
Functional beverage manufacturers/co-packers	Nano-emulsification is especially valuable for beverages (fast onset, water-solubility) — a strong technical fit; PA/NJ has active RTD/functional-shot co-packing capacity	Thomasnet co-packing listings, Cornell Cooperative Extension co-packer list, Contract Packaging Association database
Topical/cosmetics manufacturers (human)	CA and other states carve out topical/cosmetic CBD even where ingestibles are restricted — a compliance-friendly channel worth building now	Thomasnet 'cosmetic contract manufacturing' by state
Sports nutrition/recovery brands	Natural extension of the joint/recovery positioning already used in pet supplements; fast-onset nano CBD is a selling point	Same nutraceutical contract manufacturer directories — many serve both pet and sports nutrition (e.g. Neeyaan, Willings)
Veterinary-channel supplement companies	Sell through vets rather than retail — different buyer, same ingredient need, often higher trust bar (good fit for the non-detect THC story)	NASC member/Preferred Supplier list; state veterinary association vendor directories
